Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: ____.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 12, "a first end securely connected to the sleeve" is confusing because "securely connected" is generally considered as having no relative movement in between. The operation rod "securely connected" to the sleeve would render the device inoperable. In fact, as disclosed by the invention, the operation rod is movable at least axially relative to the sleeve. For clarity, applicant is suggested using "non-rotatably" in place of "securely".

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Toledo (5,829,097) in view of Bienek (5,802,670).

'097 discloses the invention as claimed but for the pressure regulating mechanism. '670 teaches a pressure regulating mechanism located exteriorly of the casing for easy adjustment of the spring load inside the casing. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the door closer of '097 with a pressure regulating mechanism as taught by '670 to enhance an easy adjustment of the spring load located inside the casing.

As to the groove-boss engagement to allow synchronized movement between the rotation rod and the piston (claim 2), '670 forms hexagonal engaging parts, splined parts or other non-rotational connection on the operation rod (12) and the sleeve (2) to permit synchronized movement. It would have been an obvious matter of design choice to modify the rod and sleeve with a groove and a boss, since applicant has not disclosed that the groove-boss engagement solves any stated problem or is for any other particular purpose and it appears that the hexagonal engagement as taught by '670 would perform equally well. *In re Kuhle*, 188 USPQ 7.

As to claim 3, it would have been an obvious matter of design choice to make the tool-receiving portion of the end member (13) of '670 with a polygonal recess or whatever form or shape was desired or expedient. A change in form or shape is generally recognized as being within the level of ordinary skill in the art, absent any showing of unexpected results. *In re Dailey et al.*, 149 USPQ 47.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
